

## Introducing SCOUT 2.0:

# Your Ultimate On-The-Move Communication Solution

Galaxy presents the SCOUT 2.0, a cutting-edge, quick-deploy communication system catering to those in need of a rugged, portable Comms-on-the-move solution. Experience seamless connectivity with effortless assembly and plug-and-play setup. Connect to the Internet in minutes, making communication hassle-free for everyone.

### Unlock Seamless Connectivity: SCOUT 2.0

#### **Rapid Deployment:**

Instantly connect to the Internet, ensuring your team is always in touch, anytime, anywhere.

#### **Enterprise-Grade Network:**

The SCOUT 2.0 boasts the latest Low Earth Orbiting (LEO) satellite WAN technology, coupled with optional LTE connectivity. Linked to our SDWAN Firewall, Access Point, and a VoIP phone, enjoy crystal-clear calls even in cellular dead zones.

#### **LEO Satellite Coverage:**

Utilize GALAXY®'s extensive LEO satellite network, covering Canada comprehensively. Benefit from our robust Enterprise platform, backed by 24/7 dedicated support.

#### **Quality of Service (QoS):**

Tailor your bandwidth to match your application needs, guaranteeing top-notch performance whenever required.

#### **Portable & Robust:**

Ideal for clients frequently on the move in remote locations, the SCOUT 2.0 is your reliable communication companion. Whether you're at a fly-in location or traveling in a vehicle, rest assured, the SCOUT 2.0 has you covered.

#### **Cost-Effective:**

Say goodbye to sky-high satellite phone costs and BGAN data rates. With the SCOUT 2.0, you save on remote installations – it's a self-installation solution that puts you in control.

#### **Customized Plans:**

Explore a wide array of enterprise services and flexible data packages tailored to meet your unique communication requirements.

## Curated for Various Remote Communication Industries
